Join Lucinda M. Fecteau, Licensed/Board Certified Occupational Therapist and Acupuncturist in exploring the ancient medical practice of acupuncture, the most widely known modality of oriental medicine. She will discuss how it works, current research and efficacy, why it is well suited to blend with Western conventional medicine, what conditions the World Health Organization has studied and found it to be clinically effective in treating, the conditions most commonly treated with acupuncture and education/licensing requirements for providers. **Do the needles hurt? Absolutely not!** A demonstration/trial after the lecture will be offered to those interested.
